C., October 18, 1807—Sealed proposals will be received at this office until mono on November 2, 1807, for the construction of the addition to the McKinley Manual Training School. Plans, specifications and necessary blank forms of proposal may be obtained by aplying to Room 43, District Building, HENRY B. F. MACPARLAND, HENRY L. WEST, J. J. MORROW, Commissioners, D. C.

El Paso Gold Ring, the first shipper of the camp.

The strike on the Chipeta tunnel, Ouray, Col., is one of the best in that section thus far made this year. Assays run 250 gold and 30 ounces sliver per ton. The ore is a carbonate, identical with that of the America Nettle, which has yielded \$5,000,000.

The Work Gold Mining Company disbursed a dividend of 1 cent a share, or \$15,000, this week. The September receipts from gross bullion were \$24,250.00. The royalties were \$6.694.12. Since April ore shipments have reached \$142,733.20, and royalties \$39,723.32. The treasury surplus October 1 was \$196,064.65, and 175 tons of ore not aettled for. The mine is one of Cripple Creek's best producers at present.

The Portland Gold Mining Company has disbursed its regiaur quarterly dividend of a centa a share. The amount, \$120,000, brings the grand total to approximately \$6,000,000. Gienwood Springs, Col., capitalists and prospectors are organizing to locate if possible radium deposits among the mineral springs in the vicinity of Glenwood, where indications seem favorable.

in the vicinity of Glenwood, where indications seem favorable.

NEW MEXICO.

SIEVER CITY, Oct. 16.—The Comanche Mining Company is making good progress unwatering the Gillet and Pacific shafts in the Pinos Aitos district. The water is now below the 600 foot level and less than 25c feet of water remains in the mines. The draining of these two mines is also having the effect of unwatering other mines in the district.

The drill which was recently placed in operation on the property of the Azure Mining Company in the Burros district, struck a large body of copper ore at a depth of 140 feet. The ore assays 30 per cent. copper. The drill has penetrated thirty feet of black oxide.

The Twin Peaks Mining and Milling Company, which was recently organized with a cepital stock of \$1,500,000, owns a group of senty-four gold and silver mines and six capper claims in the Steeple Rock district, it is arranging to do extensive development work upon the properties. About 1,000 feet of development work has been done on these claims. The several shafts are sunk on well defined veins. The Long Chance claim contains a vein of gold and silver ore which averages \$30 per ton.

The Burro Mountain Copper Company is preparing to continue its development work during the winter. It has laid in a large supply of fuel.

A rich and large body of ore has been struck in the Laura mine, signated in the

coenty-four gold and silver mines and six copper claims in the Steeple Rock district. It is arranging to do extensive development work upon the properties. About 1,000 feet of development work has been done on these claims. The several shafts are sunk on well defined veins. The Long Chance claim contains a vein of gold and silver ore which averages \$80 per ton.

The Burro Mountain Copper Company is preparing to continue its development work during the winter. It has laid in a large supply of fuel.

A rich and large body of ore has been struck in the Laura mine, signated in the Steeple Rock district, which is operated under lease by Harold C. E. Spence and Fred Perry. The ore is silver and also carries heavy gold values. It assays from \$500 to \$1,500 in silver and gold per ton. The mine was purchased about twelve years ago by a syndicate of New York and Paris men, the purchase price being \$100,000. It was shut down shortly after its purchase and was not reopened until recently. It has been producing about one car of shipping ore per day since it was reopened.

The famous Cumberland mine, situated in the forth of the week ended September 29 from the surface in the September 29 from the surface in the September 29 from the surface in the Salar and Milling Company, situated in the Slerra Juarez district, State of Oaxaca, is being doubled. This company owns the Espinol mine.

recently. It has been producing about one car of shipping ore per day since it was reopened.

The famous Cumberland mine, situated in the Kingston district, has again become a producer of ore of good grade. This mine was discovered in 1839 by Edward Coffey, who took out \$18,000 of ore in sinking the shaft is feet. He afterward took out ore to the amount of \$12,000 and then sold the property for \$30,000 cash.

A syndicate of capitalists is negotiating for the purchase of the Log Cabin mine, situated six miles south of Kingston. If the deal is consummated a mill will be installed. It is estimated that there are more than 200,000 tons of low grade ore in sight.

A strike of rich ore has been made in the Tip Top mine, owned by the Mines Development Company, situated in the Kelley district, near Magdalena. The ore runs 60 per cent. lead. The vein is 14 feet wide. This company owns the Key group of mines in that district. C. T. Brown is manager.

district. C. T. Brown is manager.

MEXICO.

MEXI

purchase of the Refugio mine and mill at Parral.

The American Smelting and Refining Company is laying in a fuel supply preparatory to blowing in some of the furnaces of its new smelter at Chihuahua the early part of next month. The initial capacity of the smelter will be 800 tons daily. The districts which will contribute ores to this smelter are Parral, Santa Eulalis, Penas Altos, Batopilas, Casas Grandes, Sabinal, Urique, Jesus Maria, Ocampo, San Juan de Olivos, Inde and Guanacevi.

Ocampo, San Juan de Olivos, Inde and Guanacevi.

It is announced that large bodies of high grade ore have been opened up in the tenth, eleventh and twelfth levels of the Blanco lode of the mine of the Palmarejo and Mexican Goldfields, Ltd., and that these ore reserves amount to more than 80,000 tons. The Oxnam Prospecting Company has begun the drushing of Palmarejo ores.

The San Antonio mine, situated in the State of Sonora, has developed into a rich producer. It is owned by the Boston-Mexican Mines Company. The rich vein of silver ore which was recently discovered in tunnel No. 1 of this property has increased in size from eight to eleven feet. This is the width on the foot wall, while on the hanging wall a large body of black sulphide of silver has been uncovered. It is stated that this ore runs more than 1,500 ounces of silver to the ton. The ore which is now being sacked for shipment runs 800 ounces of silver to the ton.

A twelve stamp mill is being installed at

ton. The ore which is now being sacked for shipment runs 500 ounces of silver to the ton.

A twelve stamp mill is being installed at the Liuvia de Ore gold mine is the Urique district, State of Chihuahua.

The Southern Mining Company, which is composed of Birmingham, Ala., men, will install a five stamp mill and a cyanide plant at its mine in the Ocampo district, State of Chihuahua.

The Globe Mining Company, in which several New Yorkers are interested, is obtaining excellent results at its mine at Niaca, Chihuahua, Mex. One mine in its group of concessions, known as La Perla, has been developed to a point which, the managers say, makes success a certainty. The Santa Teresa and Santa Elena shafts, which are only thirty feet down, show mineral from which assays have been made of, 350 a ton. A first shipment to the smelter is to be made in a few days.

D. F. Micklejohn is sinking two shafts on a rich vein in the Guanajuate district. In one of the shafts a vein two feet wide and averaging \$160 to the ton in values was struck.

It is reported that an American company has secured an option to purchase the rich El Monte San Nicolas mine, situated in the Guanajuato district. The ore in this mine runs as high as \$0.000 gold and five kilos of silver to the ton. The weekly shipments of ore which are made to the smelter average about \$500 per ton.

A syndicate of Canadian men has taken preliminary steps to install a large hydroelectife plant within convenient distance of the Parral and other mining districts of Chihuahua and Durange with a view to providing power for the mines and mills. It is stated that a representative of the syndicate

Goldfield, Oct. 13.—The gold production for the week ended September 20 from the mines and leases of Goldfield was 4,129 tons, having an estimated value of \$401,700. This is the heaviest production in the history of the district, but the value is less than several weeks ago, when a less amount of ore was produced. During the last three months, with the last two days of September estimated, the total output of the mines and leases of Goldfield was 48,134 tons of gold ore, with an estimated value of \$5,170,000.

Two leasing companies, the Mohawk-Jumbo and the Francia-Mohawk, distributed dividends on October 4, the former \$40,000 and the latter \$91,000. A dividend of \$100,000 is expected from the Little Florence before the end of the month.

A body of rich ore has been encountered in the lease of the Daisy Leasing Company on the west end of the Daisy Leasing Company on the west end of the Daisy syround. Average values taken from a full face range, principally in gold, from \$731 to \$585.

Vennon, Oct., 16.—An entirely new vein showing ruby silver, native silver and sylvanite has been opened in the 300 level of the Fairview mine. The vein is in the south drift and is about three feet wide. Assays abow values ranging from \$72 to \$400 to the ton. The Monnette and Truitt lease on Fairview ground has broken into eighteen inches of white quartz, carrying free gold, at a depth of 120 feet.

In the Belaware Company's ground lessees have broken into a rich vein of quartz, and on the Gold Kun a body of quartz showing gold values has been opened. All of these properties adjoin the Seven Troughs Fairview. Ely, Nev., Oct. 18.—Ely mines are reducting their forces. The Giroux Consolidated walues has been opened.

In the Rickard-Ely, according to report, a churn drill has struck a stratum of native copper at a depth of 1,051 feet. It is said to be increased. At the Ruth and Star Pointer shefts about forty miners were dismissed.

In the Rickard-Ely, according to report, a churn drill has struck a stratum of native copper at a depth

SEATTLE, Oct 14.—The Mosier dredge at orty-mile is working in ground that averages SEATTLE, Oct 14.—The Mosier dredge at Forty-mile is working in ground that averages 311 a yard.

A despatch from Chena says: Ester Creek is the latest scene of rich strikes. In a prospecting shaft on 8-b Ester the claim of Berry Broa., formerly owned by George Gates of Chena, the workmen on Tuesday uncovered dirt four feet above bedrock that is said to ran as high as 811 to the pan and that will average 36 to the pan. The claim was originally of Chena ownershp. George Gates sold it to the Berrys and has regretted the fact ever since. It has turned out to be one of the richest claims in the Tanana.

The latest reports from the Chandlar district brought out by a miner who worked there seven months are encouraging. Ernest Nethoff says that many individual claim owners have taken out from \$4.000 to \$9.000 each during the early part of the senson,

ferred stock. The earnings be-yond that are divided one-half to the preferred stockholders and one-half to the management. Un-less the stockholders make money, make more than 5 per cent, the management gots nothing.

r all tenders.

THE NEW YORK TRUST COMPANY.

By F. J. HORNE, Secretary

New York, October 17th, 1997.

that is up to July 26, the date when Neihoff eft. Yoseta, a Japanese, has ground that is yielding \$100 a day to the shove!.

The Nabessa region, in the towering group of summits around Mount Wrangell, is the latest scene of copper discoveries in Alaska. There are but six parties, aggregating seventeen men, in the whole district. There is one assayer there, and the mountains are huge deposits running 6 per cent. copper. with occasional ledges of bornite running up to 50 per cent, copper. The huge obstacle to development is the enormous cost of transporting supplies.

The output of the Tanana district for the vear may equal or even exceed that of last year. The three banks at Fairbanks have already taken in very nearly six million dollars in dust and they estimate their receipts for the balance of the year on a conservative basis at two and one-half millions more.

SEATTLE, Oct. 14.—Development work on Table Mountain mine in Skagit county shows gain in values, particularly in arsenic. One hundred and forty feet of tunnel has been driven and a fifty foot shaft sunk. The arsenic values are now greater than the combined gold, silver and copper. They have increased from \$24 on the surface to \$40 at a depth of fifty feet.

A small smelter will be built on Gold Creek near Twisp, in the Okanogan. The plant will cost \$16,000.

A new ledge has been exposed on the Wyandotte group near Loomis. The property is owned by F. P. Webe, who made the find while doing his annual assessment work in a new place, with the result that he has exposed a showing said to eclipse anything else ever found on the property.

The Snoqualmic Copper Company is having its claims surveyed for patent.

The Mount Baker and Shuksan mine has been sufficiently developed since the instaliation of its power drills to warrant the erection of a mill, and the management announces that a plant will be installed.

A cleanup of the tailings in the cyanide tanks at the Bonita mine in Slate Creek last week yielded forty-five pounds of gold. The Bonita mill will be operated throughout the winter. WASHINGTON.

week yielded forty-five pounds of gold. The Bonita mill will be operated throughout the winter.

Neste brothers have discovered a deposit of nolybdenite on Jumbo Mountain near Darrington.

The Sill claims on White Horse Mountain show thirty-six feet of ledge width with only fifty-six feet of work. The values are in a galeno ore.

W. B. Moon of Chelan, acting for Eastern investors, has bonded nine molybdengue claims on Sheep Mountain, near Twisp.

A. Raub of Spokans has transferred a half interst in the Russia-Japan mine at Twisp to C. S. Jennings of the same place. In consideration Mr. Jennings is to expend \$50.000 in the development of the property.

Orient's one big mine, the First Thought, shipped \$35,000 worth of ore during September. The net profit was in excess of \$20,000.

The annual report of the Q. S. mine manager shows that more than \$20,000 was expended during the year. The ore body was drifted on 238 feet at a depth of 800 feet, and considerable machinery for early installation is under contract.

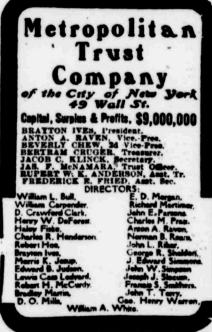

SOME INQUIRY FOR IRON.

PITTABUBO, Oct. 19.—There was a move-ment of some sort in pig iron in the week just closed, and though prices were not so stiff as had been hoped for the fact that there was some pig iron moved tended to improve the situation. There were saics during the week of about \$,000 tons, most of it basic iron, and the prices ranged from \$10.50 down to \$10, and it is whispered that some

went even lower. In any event the price was the lowest of the year.

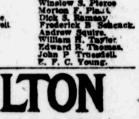

There is a lot of inquiry for malleable bessemer iron and rumors have it that a There is also a rumor that foundry is to wake up. Inquiries from large sources appear to have encouraged, the trade to believe to have encouraged the trade to believe that there will be some selling within the next few days.

One close to the United States Steel Corporation said at the close of the weak that there would not be any outside call for piking iron on the part of the corporation in the next year. The Carnegie Steel Company has fifty-five blast furnaces and is operating fifty of them at the present time to their full capacity.
